Summary

Results-driven Backend Developer with 5 years of software engineering experience. Proven track record of building scalable microservices, implementing security solutions, and optimizing database performance.

Experience

Telkom Indonesia, Backend Developer – Jakarta Feb 2023 – present

- Migrated 1M+ PII records with zero downtime through an on-the-fly table migration strategy, implementing end-to-end (E2E) encryption, decryption and hashing to replace plain text data
- Build disbursement and reconciliation pipeline system, integrated with the Xendit payment gateway with BullMQ queue, improving disbursement speed by 80%, handle daily disbursement up to 50M+
- Build an export system using Redis BullMQ queue architecture between Node.js and Go services for the Koperasi Desa Merah Putih national CMS, handling 500+ daily requests and seamlessly exporting 100K+ data records
- Established a standardized Go codebase using Hexagonal Architecture for improved maintainability
- Developed a Kafka DLQ monitoring dashboard with Go templating to streamline error resolution, mitigate business impact, and provide comprehensive oversight of message processing
- Normalized 500K+ user email records to lowercase format during live production
- Engineered a Multi-Factor Authentication (MFA) system with OTP via email and SMS using Redis
- Integrated Kafka message broker infrastructure for efficient event handling
- Solved critical penetration testing vulnerabilities related to authorization and authentication in user service
- Developed Backend CMS using PHP Laravel for content management requirements
- Diagnosed and resolved database query bottlenecks through performance profiling with APM Custom Spans, significantly improving overall system response times"

Alteacare, Backend Developer – Tangerang Jan 2023 – Feb 2023

- Initiated the migration of a new backend service from Node.js to Go for improved performance
- Contributed to architecture planning for legacy system modernization

Female Daily, Backend Developer – Jakarta May 2021 – Sept 2022

- Successfully scaled the SSO service during the Jakarta Xbeauty event, handling 93K+ concurrent visitors, use vertical and horizontal scaling
- Successfully Migrated the Review Product service from a monolith to a microservices architecture
- Constructed a live chat service for the Xbeauty event using Python Django channels
- Build comprehensive account deletion feature using NestJS with automated cron jobs and RabbitMQ for processing
- Built a Single Sign-On (SSO) service for the CT Corp ecosystem integration using Go
- Applied product filter functionality using Elasticsearch for enhanced user experience
- Formulated an email service using RabbitMQ and Node.js for reliable message delivery
- Built a point service for the Xbeauty event reward system using Node.js
- Created a migration service using Python Flask for data transformation
- Maintained all services using Kubernetes and Sentry for monitoring and error tracking
- Deployed services to Kubernetes on both GCP and AWS environments
- Collaborated effectively with frontend, mobile, product, and CT Corp teams

Bpjs Ketenagakerjaan, Administrative Officer – Jakarta June 2016 – May 2021

- Monitored business operations and led a team of 2 employees
- Negotiated with internal and external stakeholders
- Prepared comprehensive monthly and yearly management reports
- Honed strong analytical and leadership skills

Projects

- AskingPDF – AI Document Assistant** – <https://askingpdf.damarowen.blog/> 2026-Present
- Engineered an AI-powered PDF analysis web application utilizing Retrieval-Augmented Generation (RAG) architecture for intelligent document querying
 - Integrated the Gemini API, advanced text embeddings, and a vector database to accurately retrieve and extract context-aware insights from user documents
 - Implemented data processing pipelines utilizing n8n-as-code to seamlessly handle document ingestion, chunking, and real-time conversational processing

Education

- BSc Mercu Buana University**, BSc in Human Resource Management – Indonesia Jan 2013 – Dec 2017
- Assoc Bina Sarana Informatika**, Assoc in Web Development – Indonesia June 2012 – Sept 2015

Skills

Programming Languages: Go, JavaScript, Node.js, Python, PHP

Frameworks & Libraries: NestJS, Laravel, Django, Flask, React, Vue.js

Databases: MySQL, PostgreSQL, MongoDB, NoSQL, Redis, Elasticsearch

Cloud Platforms: AWS, GCP

DevOps & Tools: Docker, Kubernetes, Helm Templates, CI/CD, Gitflow, Terraform

Message Brokers: RabbitMQ, Apache Kafka, BullMQ

Architecture: Microservices, Hexagonal Architecture, RESTful APIs

Security: Authentication, Authorization, MFA, OTP, Data Encryption-Decryption, Hashing

Monitoring: APM, Elastic Performance Profiling, Sentry, Datadog

Awards

Third Place, AI Competition – Telkom Indonesia, Padi UMKM Tribe (2025) Developed AI monitoring tools with a chatbot named WaspadaAI

Certifications

Google Cybersecurity Professional Certificate V2 – Coursera (2024-08)

Database Design Fundamentals for Software Engineers – Educative (2023-01)

AWS Cloud Technical Essentials – Coursera (2023-05)

Legacy JavaScript Algorithms and Data Structures – freeCodeCamp (2022-10)

Languages

Indonesian: Native

English: Professional Working Proficiency
